

Q4 (Coordinates) Day 7 **Name:** _____

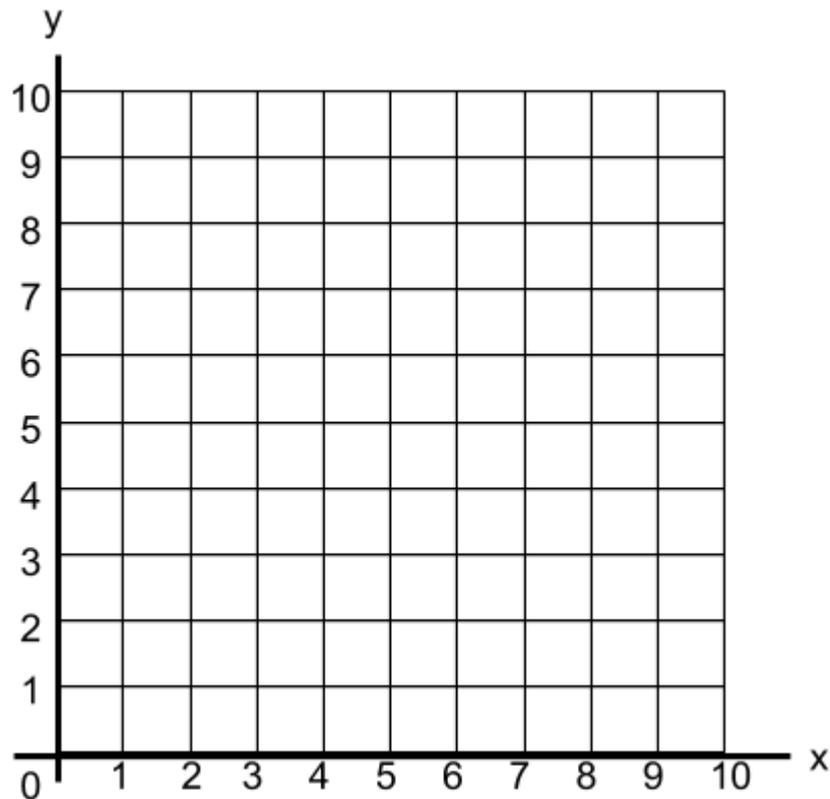

1. Look at the grid below. It will help you answer the question below.

A line is drawn from the point **(1,1)** to the point **(9,9)**. What are the **coordinates** of the **point halfway along this line**? Give your answer by **writing a number** in **each** of the **spaces** below.

(_____ , _____)

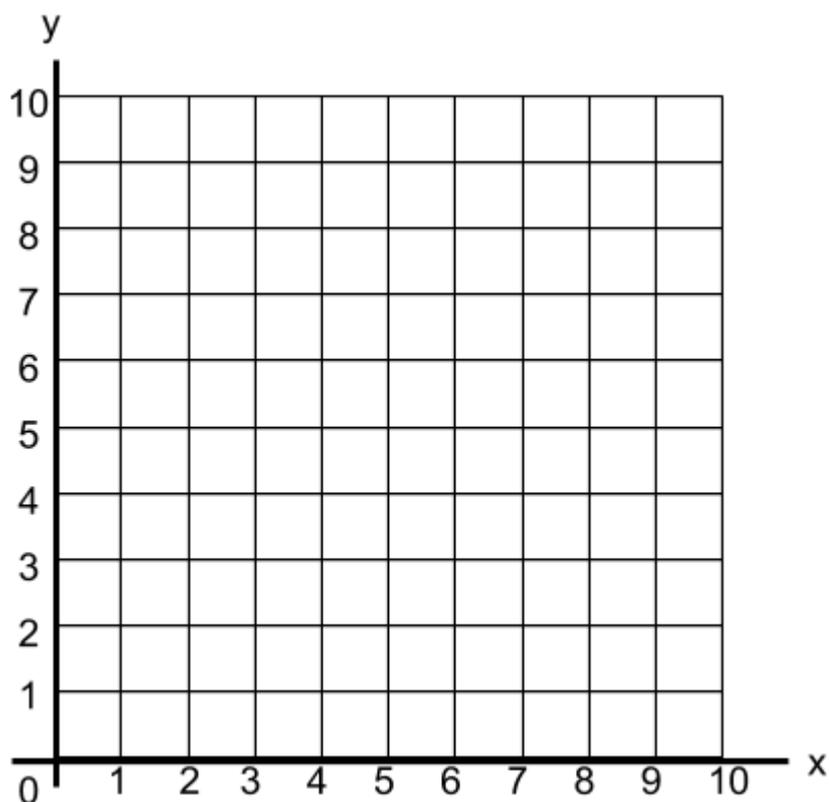

2. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(2,3)$ to the point $(6,7)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

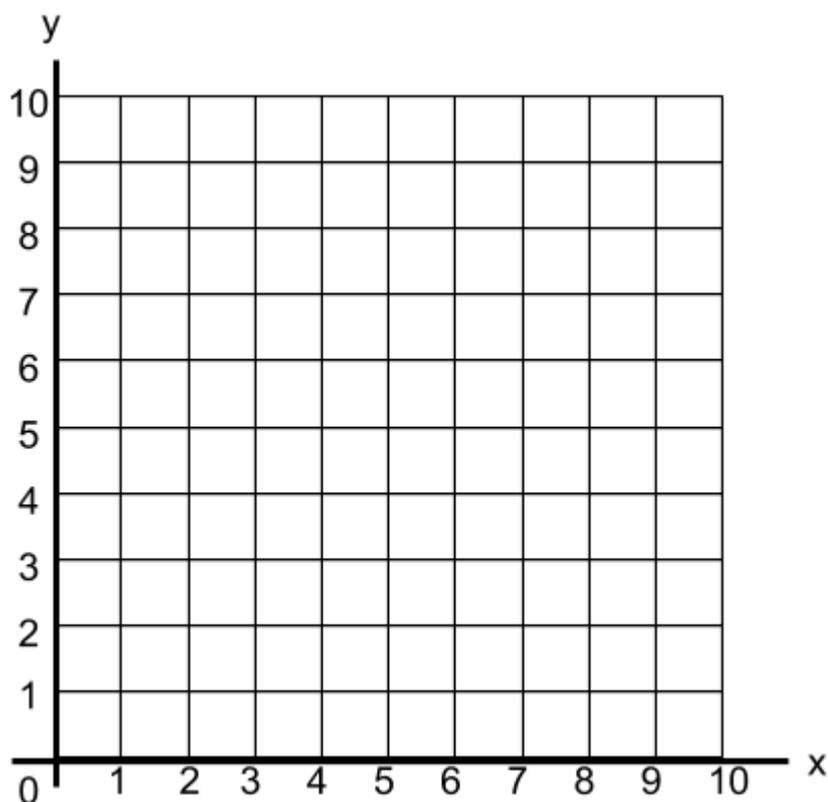

3. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(2,4)$ to the point $(8,8)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

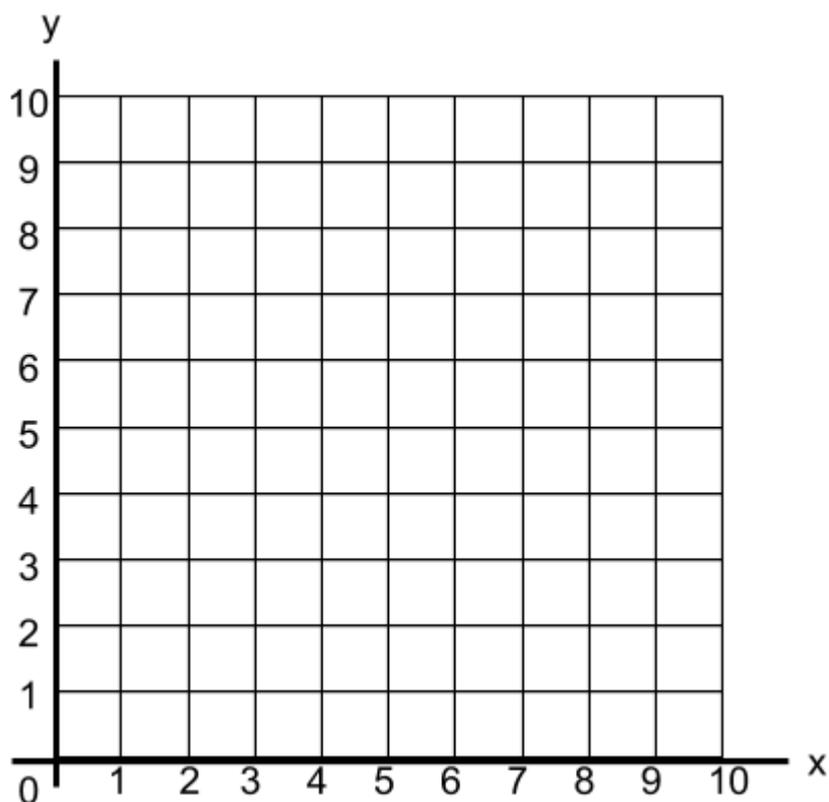

4. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(1,3)$ to the point $(7,7)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

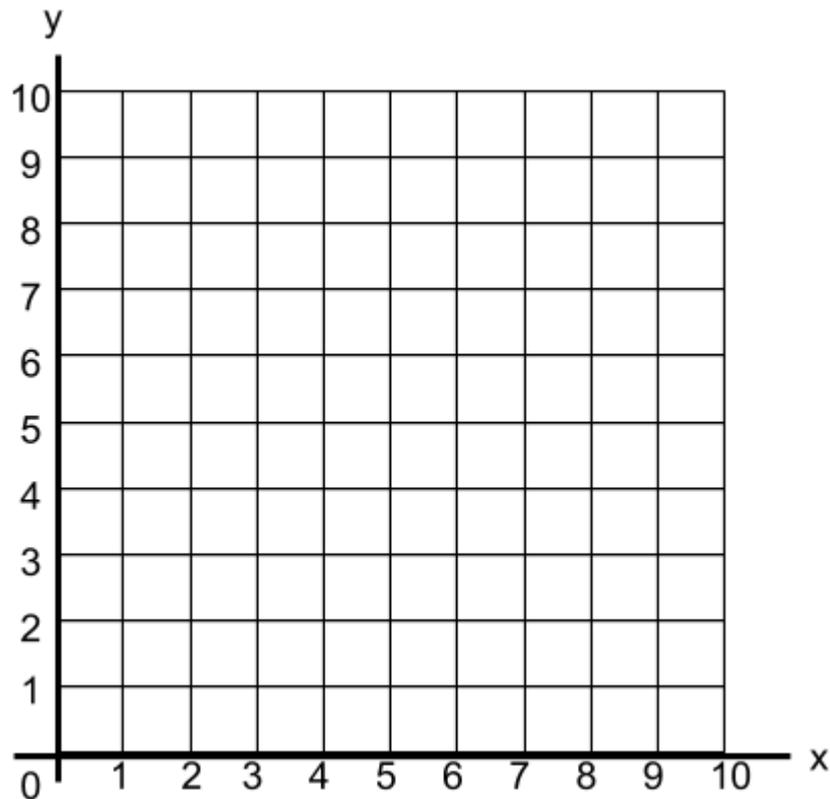

5. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(2,7)$ to the point $(8,3)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

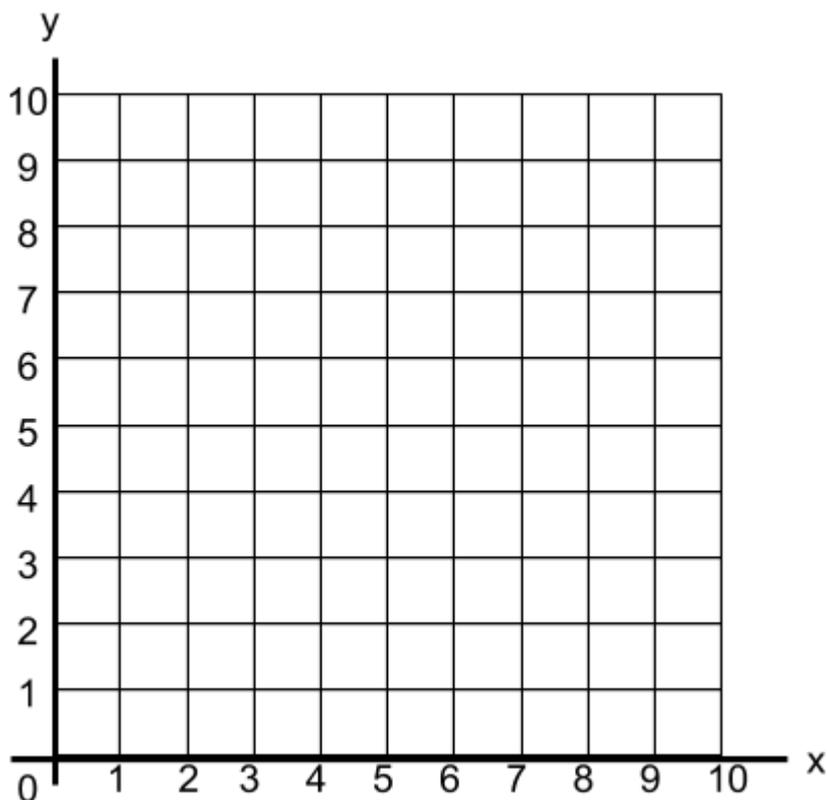

6. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(1,1)$ to the point $(7,3)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

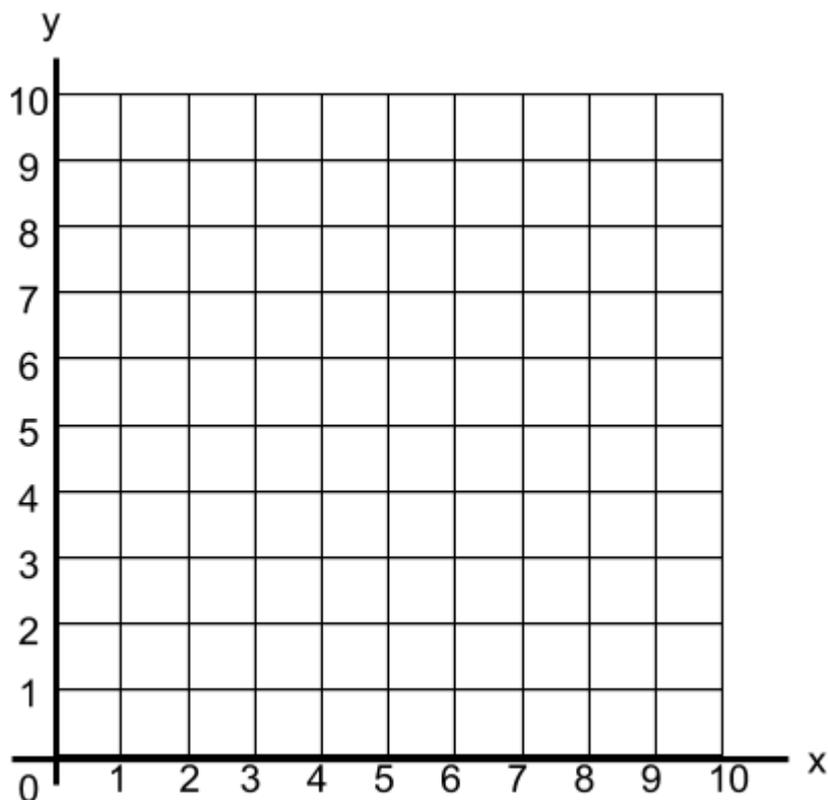

7. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(5,1)$ to the point $(7,9)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

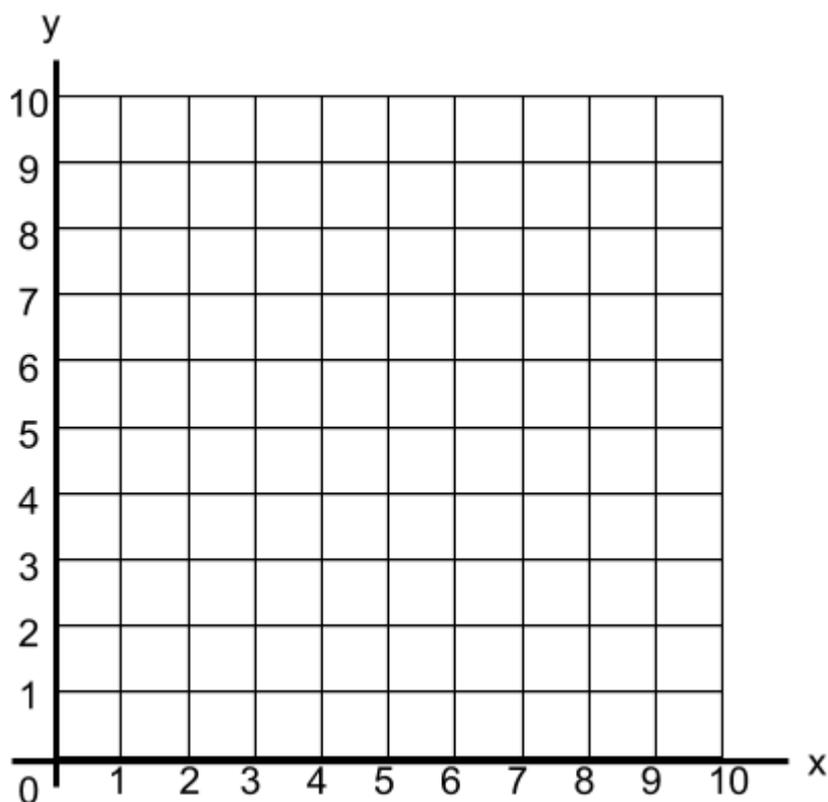

8. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(1,4)$ to the point $(9,4)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

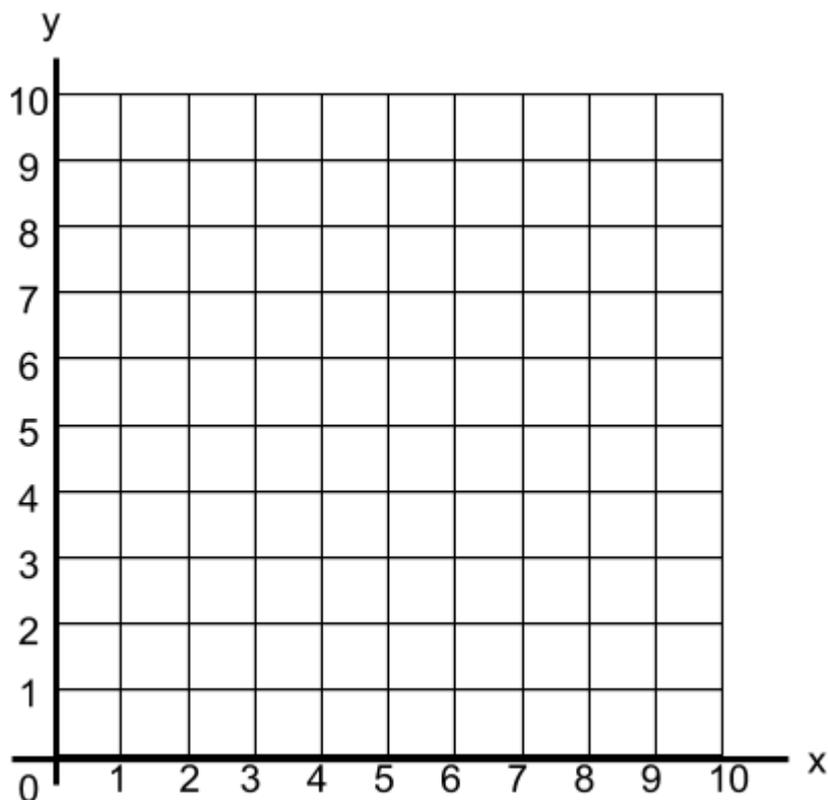

9. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(2,2)$ to the point $(7,8)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

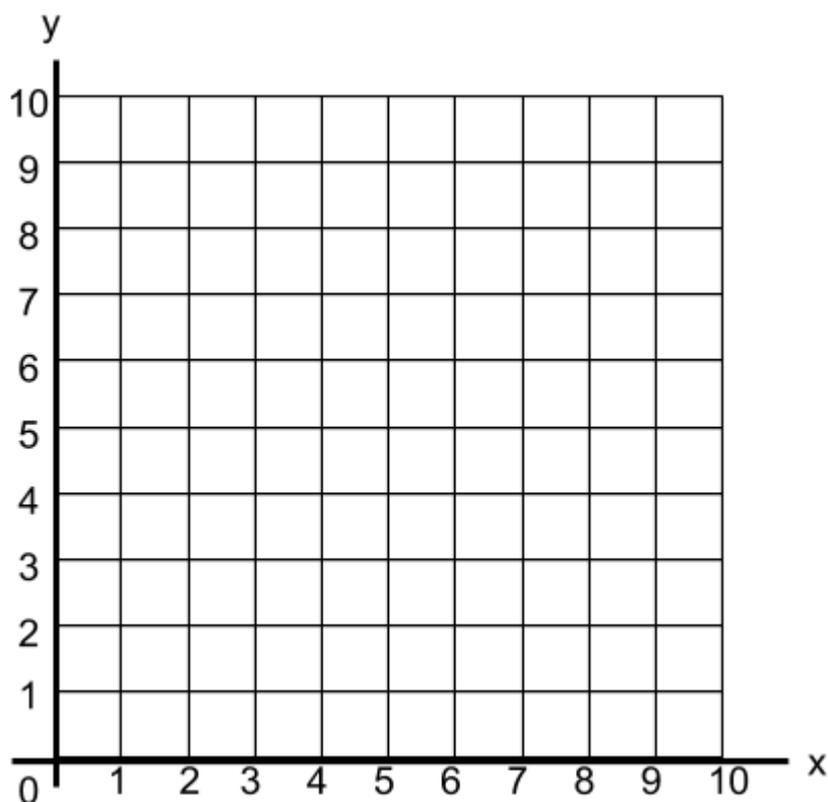

10. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(2,10)$ to the point $(8,1)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

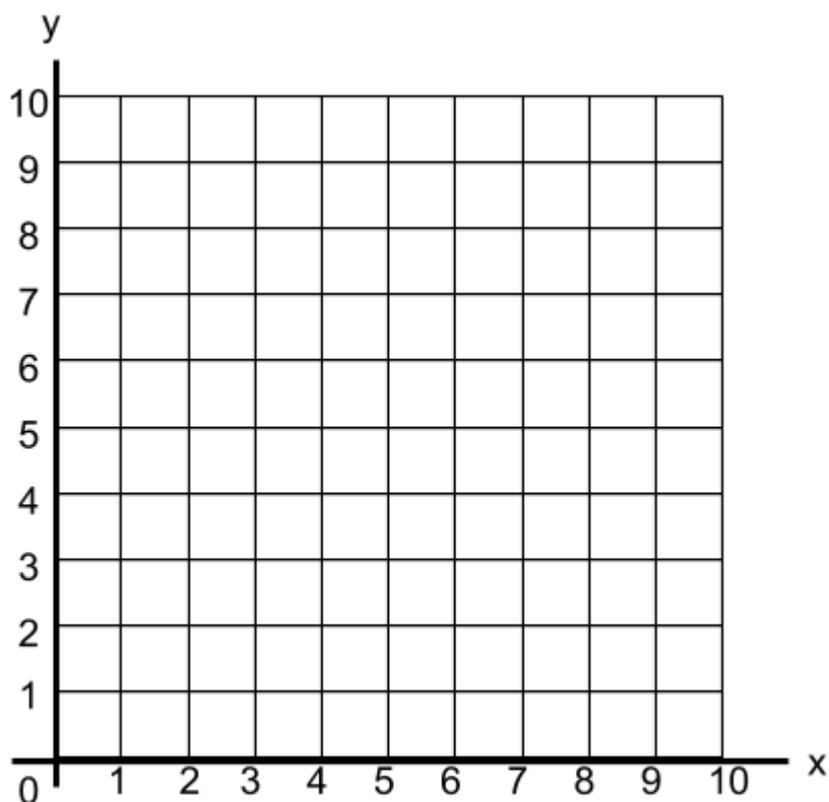

11. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(6,2)$ to the point $(8,10)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

12. Look at the grid below. It will help you answer the question below.

A line is drawn from the point $(7,1)$ to the point $(1,5)$. What are the coordinates of the point halfway along this line? Give your answer by writing a number in each of the spaces below.

(_____ , _____)

Answers

1. (5,5)
2. (4,5)
3. (5,6)
4. (4,5)
5. (5,5)
6. (4,2)
7. (6,5)
8. (5,4)
9. (4.5,5) or (4½,5)
10. (5,5.5) or (5,5½)
11. (7,6)
12. (4,3)
