

Q2 (Problem Solving) Day 21**Name:** _____

1. A box weighs 50 grams.

What is the weight of 15 boxes? Write your answer **in kilograms** in the space below.

_____ kg

2. A box weighs 27 grams.

What is the weight of 21 boxes? Write your answer **in kilograms** in the space below.

_____ kg

3. A box weighs 34 grams.

What is the weight of 33 boxes? Write your answer **in kilograms** in the space below.

_____ kg

4. A box weighs 0.03 kilograms.

What is the weight of 37 boxes? Write your answer **in grams** in the space below.

_____ g

5. A box weighs 62 grams.

What is the weight of 42 boxes? Write your answer **in kilograms** in the space below.

_____ kg

6. A box weighs 0.007 kilograms.

What is the weight of 47 boxes? Write your answer **in grams** in the space below.

_____ g

7. A box weighs 76 grams.

What is the weight of 51 boxes? Write your answer **in kilograms** in the space below.

_____ kg

8. A box weighs 0.149 kilograms.

What is the weight of 58 boxes? Write your answer **in grams** in the space below.

_____ g

9. A box weighs 143 grams.

What is the weight of 64 boxes? Write your answer **in kilograms** in the space below.

_____ kg

10. A box weighs 0.045 kilograms.

What is the weight of 126 boxes? Write your answer **in grams** in the space below.

_____ g

11. A box weighs 98 grams.

What is the weight of 137 boxes? Write your answer **in kilograms** in the space below.

_____ kg

12. A box weighs 0.07 kilograms.

What is the weight of 249 boxes? Write your answer **in grams** in the space below.

_____ g

Answers

- 1. 0.75kg**
- 2. 0.567kg**
- 3. 1.122kg**
- 4. 1110g**
- 5. 2.604kg**
- 6. 329g**
- 7. 3.876kg**
- 8. 8642g**
- 9. 9.152kg**
- 10.5670g**
- 11.13.426kg**
- 12.17430g**
