

**Q5 (Palindromic Number) Day 12** Name: \_\_\_\_\_

---

1. A palindromic number is one which **reads the same forwards as backwards**. **818** is an example of a **palindromic number**. What is the first **palindromic number** before **200**? Write your answer in the space below.

---

---

2. A palindromic number is one which **reads the same forwards as backwards**. **818** is an example of a **palindromic number**. What is the first **palindromic number** after **500**? Write your answer in the space below.

---

---

3. A palindromic number is one which **reads the same forwards as backwards**. **818** is an example of a **palindromic number**. What is the first **palindromic number** before **700**? Write your answer in the space below.

---

---

4. A palindromic number is one which **reads the same forwards as backwards**. **818** is an example of a **palindromic number**. What is the first **palindromic number** after **300**? Write your answer in the space below.

---

---

5. A palindromic number is one which **reads the same forwards as backwards**. **818** is an example of a **palindromic number**. What is the first **palindromic number** before **400**? Write your answer in the space below.

---

6. A palindromic number is one which **reads the same forwards as backwards**. **818** is an example of a **palindromic number**. What is the first **palindromic number** after **900**? Write your answer in the space below.

---

7. A palindromic number is one which **reads the same forwards as backwards**. **2112** is an example of a **palindromic number**. What is the first **palindromic number** before **2300**? Write your answer in the space below.

---

8. A palindromic number is one which **reads the same forwards as backwards**. **2112** is an example of a **palindromic number**. What is the first **palindromic number** after **3700**? Write your answer in the space below.

---

9. A palindromic number is one which **reads the same forwards as backwards**. **2112** is an example of a **palindromic number**. What is the first **palindromic number** before **8900**? Write your answer in the space below.

---

10. A palindromic number is one which **reads the same forwards as backwards**. **11211** is an example of a **palindromic number**. What is the first **palindromic number** after **50000**? Write your answer in the space below.

---

11. A palindromic number is one which **reads the same forwards as backwards**. **11211** is an example of a **palindromic number**. What is the first **palindromic number** before **75000**? Write your answer in the space below.

---

12. A palindromic number is one which **reads the same forwards as backwards**. **11211** is an example of a **palindromic number**. What is the first **palindromic number** after **89000**? Write your answer in the space below.

---

**Answers**

- 1. 191**
- 2. 505**
- 3. 696**
- 4. 303**
- 5. 393**
- 6. 909**
- 7. 2222**
- 8. 3773**
- 9. 8888**
- 10.50005**
- 11.74947**
- 12.89098**
