STIRLING TUITION

Q5 (Equivalent Fractions) Day 43 Name: _____

---

1. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{4}{10} = \frac{\square}{5}$$

$$\frac{4}{\square} = \frac{8}{12}$$

---

2. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{6}{21} = \frac{\square}{7}$$

$$\frac{4}{\square} = \frac{12}{36}$$

---

3. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{1}{2} = \frac{\square}{6}$$

$$\frac{9}{\square} = \frac{3}{5}$$

4. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{4}{9} = \frac{\square}{27}$$

$$\frac{2}{\square} = \frac{6}{33}$$

5. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{12}{13} = \frac{\square}{39}$$

$$\frac{5}{\square} = \frac{25}{50}$$

6. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{2}{3} = \frac{\square}{15}$$

$$\frac{21}{\square} = \frac{7}{8}$$

7. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{4}{9} = \frac{\square}{81}$$

$$\frac{44}{\square} = \frac{11}{21}$$

---

8. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{7}{12} = \frac{\square}{72}$$

$$\frac{1}{\square} = \frac{6}{24}$$

---

9. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{7}{10} = \frac{\square}{120}$$

$$\frac{35}{\square} = \frac{7}{17}$$

---

10. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{33}{121} = \frac{\square}{11}$$

$$\frac{1}{\square} = \frac{3}{123}$$

---

11. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{2}{7} = \frac{\square}{147}$$

$$\frac{99}{\square} = \frac{9}{12}$$

---

12. Look at the fractions below.

Fill in the gaps with the correct values to make the fractions **equivalent**.

$$\frac{4}{16} = \frac{\square}{4}$$

$$\frac{98}{\square} = \frac{2}{3}$$

Answers

1.	**2**	**6**
2.	**2**	**12**
3.	**3**	**15**
4.	**12**	**11**
5.	**36**	**10**
6.	**10**	**24**
7.	**36**	**84**
8.	**42**	**4**
9.	**84**	**85**
10.	**3**	**41**
11.	**42**	**132**
12.	**1**	**147**
