

Q2 (Palindrome) Day 51 Name: _____

1. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 400**? Write your answer in the space below.

2. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 200**? Write your answer in the space below.

3. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 500**? Write your answer in the space below.

4. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 800**? Write your answer in the space below.

5. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **smallest** palindrome which is **more than 300**? Write your answer in the space below.

6. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 900**? Write your answer in the space below.

7. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **smallest** palindrome which is **more than 600**? Write your answer in the space below.

8. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 700**? Write your answer in the space below.

9. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **smallest** palindrome which is **more than 1000**? Write your answer in the space below.

10. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 5000**? Write your answer in the space below.

11. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **smallest** palindrome which is **more than 9000**? Write your answer in the space below.

12. A number is a **palindrome** if it looks **the same backwards as forwards**. For example, the three numbers: 232, 16061 and 11311 are all palindromes. What is the **biggest** palindrome which is **less than 10,000**? Write your answer in the space below.

Answers

- 1. 393**
- 2. 191**
- 3. 494**
- 4. 797**
- 5. 303**
- 6. 898**
- 7. 606**
- 8. 696**
- 9. 1001**
- 10.4994**
- 11.9009**
- 12.9999**
