

Q1 (Plot Coordinates) Day 131 Name: _____

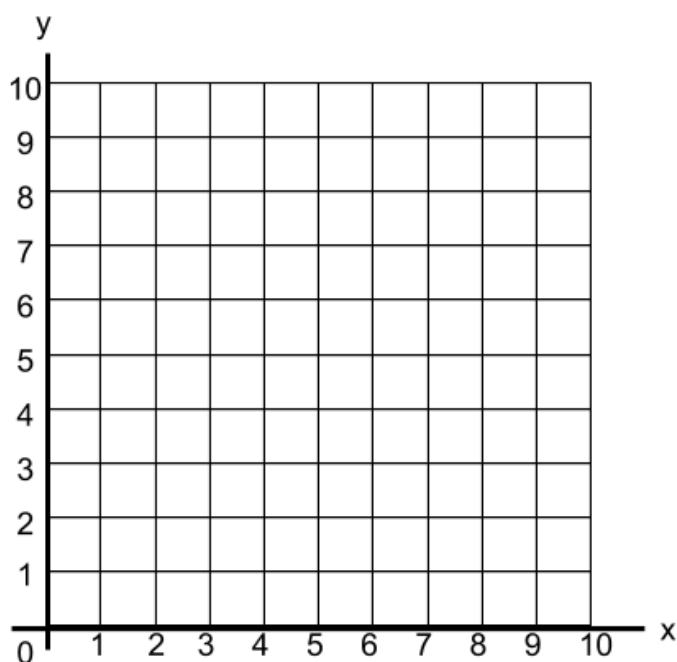

1. Plot the point $(1, 5)$ and $(7, 3)$ on the grid below. Mark the location of each point on the grid clearly.

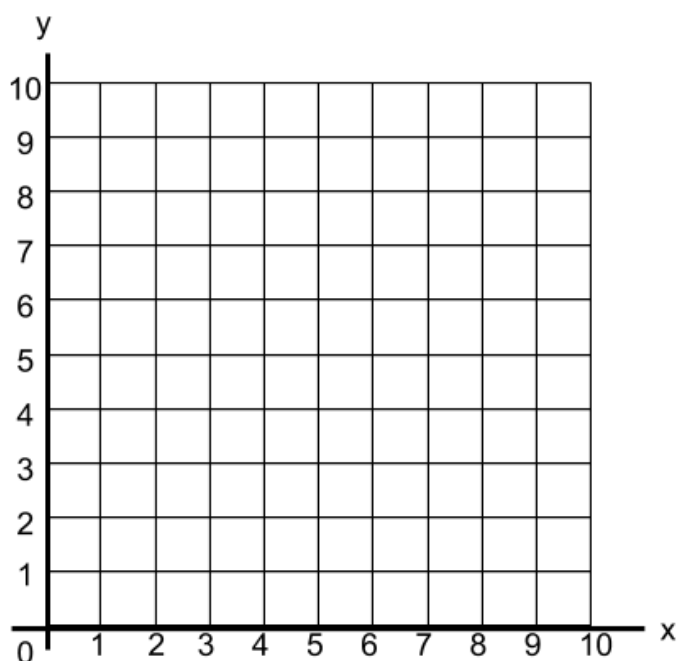

2. Plot the point $(2, 7)$ and $(3, 1)$ on the grid below. Mark the location of each point on the grid clearly.

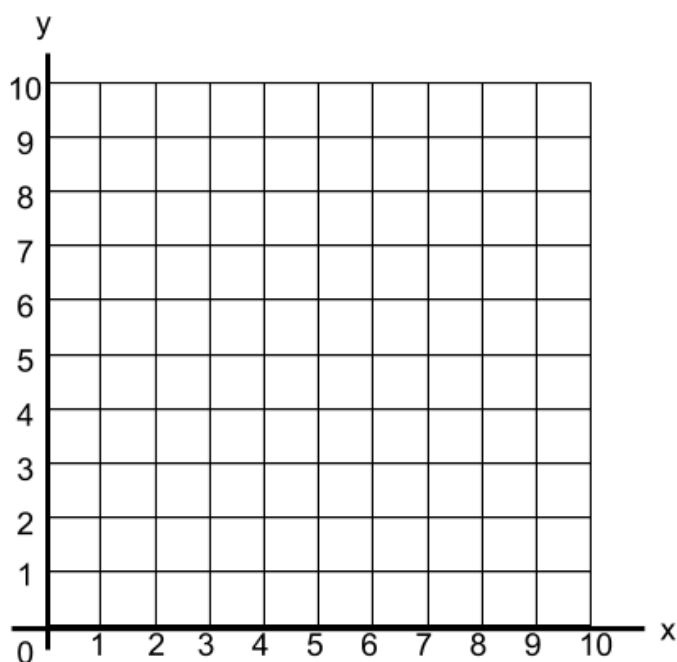

3. Plot the point **(3, 9)** and **(4, 10)** on the grid below. Mark the location of each point on the grid clearly.

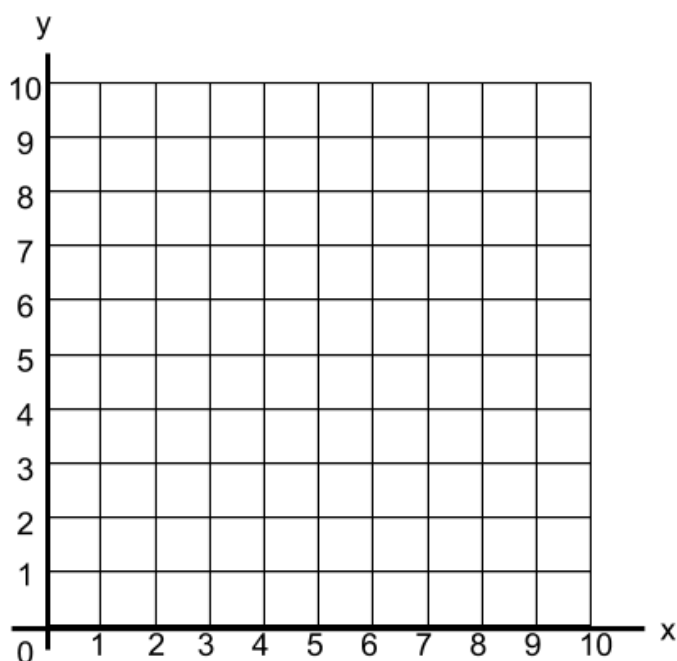

4. Plot the point **(6, 0)** and **(4, 8)** on the grid below. Mark the location of each point on the grid clearly.

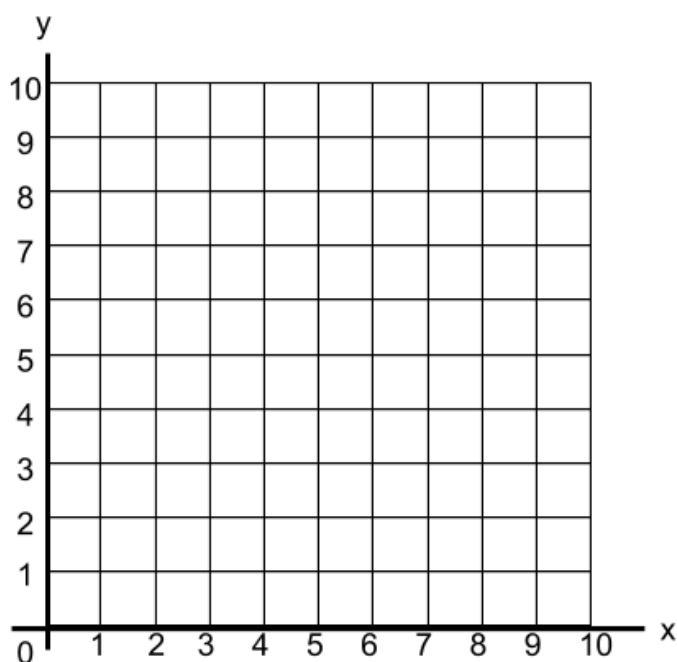

5. Plot the point $(9, 2)$ and $(4, 7)$ on the grid below. Mark the location of each point on the grid clearly.

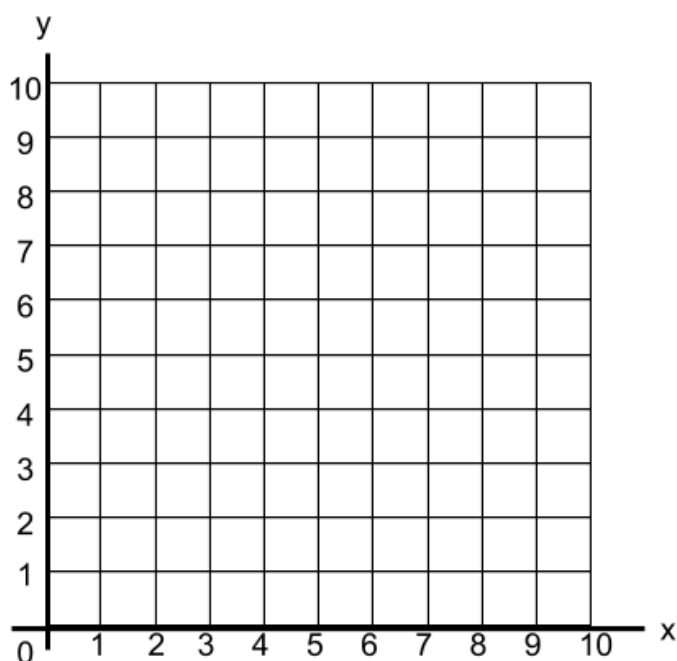

6. Plot the point $(6, 0)$ and $(8, 2)$ on the grid below. Mark the location of each point on the grid clearly.

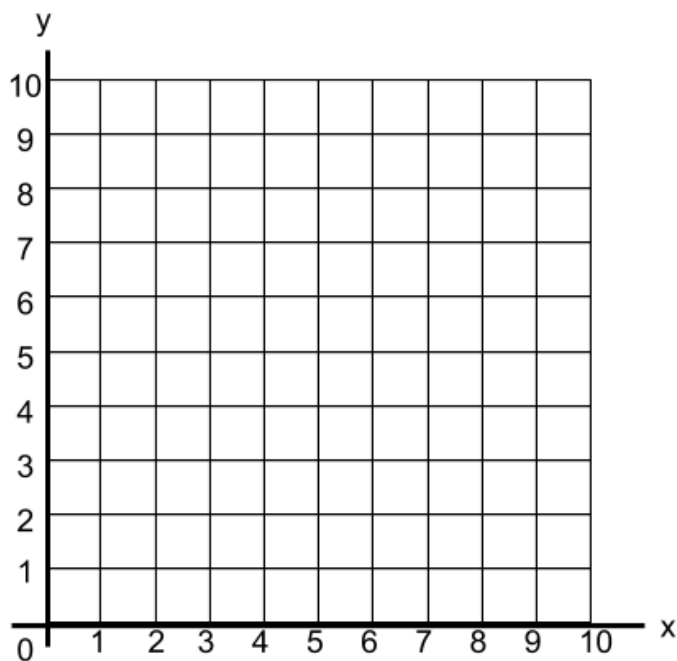

7. Plot the point $(1, 5)$ and $(7, 3)$ on the grid below. Mark the location of each point on the grid clearly.

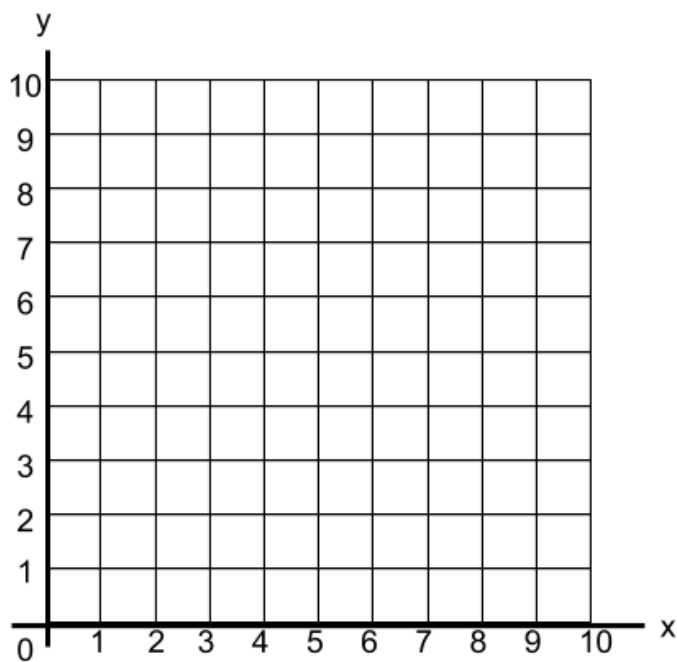

8. Plot the point $(9, 6)$ and $(3, 3)$ on the grid below. Mark the location of each point on the grid clearly.

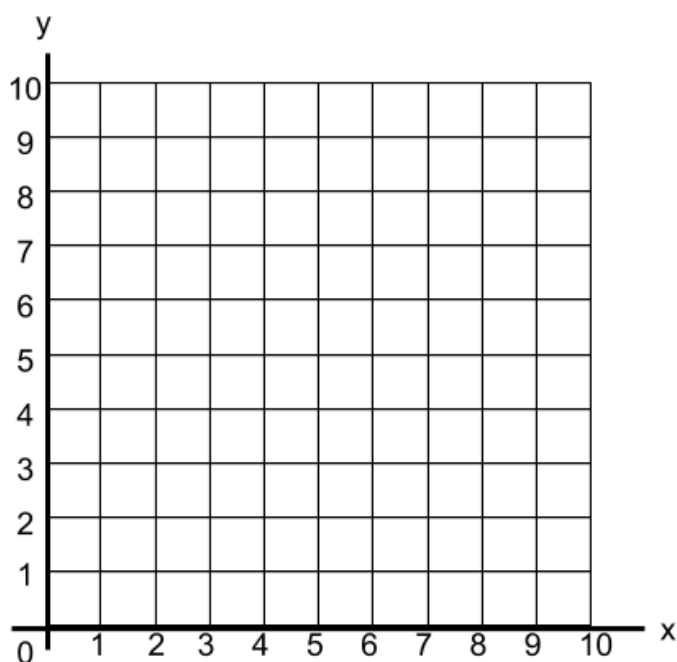

9. Plot the point **(0, 5)** and **(9, 10)** on the grid below. Mark the location of each point on the grid clearly.

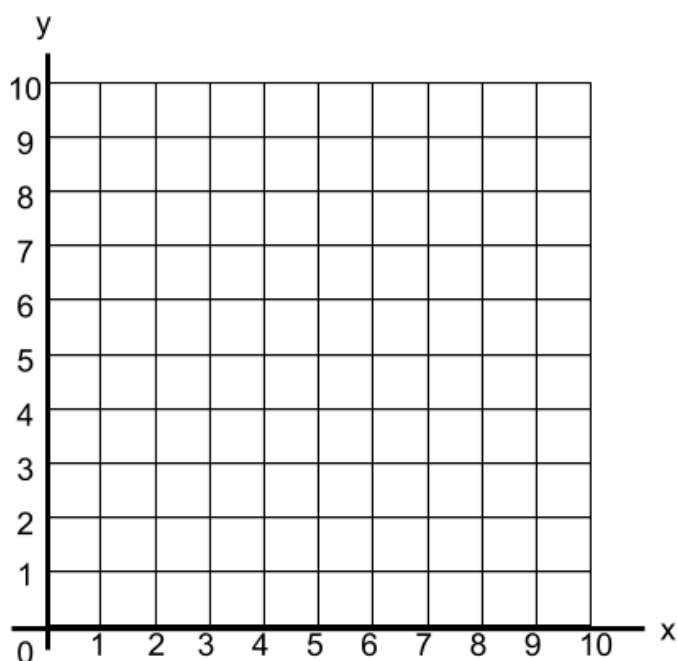

10. Plot the point **(6, 2)** and **(1, 9)** on the grid below. Mark the location of each point on the grid clearly.

11. Plot the point $(4, 0)$ and $(0, 10)$ on the grid below. Mark the location of each point on the grid clearly.

12. Plot the point $(2, 3)$ and $(10, 10)$ on the grid below. Mark the location of each point on the grid clearly.

Answers

Ensure that the X (across) coordinate is located first, followed by the Y coordinate.
