

Q1 (Symmetry) Day 139 Name: _____

1. The **shape** below is a square.

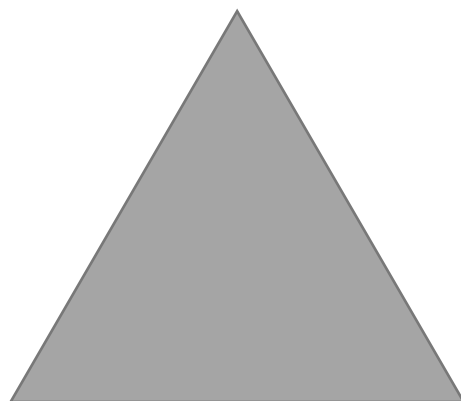

How many lines of symmetry does this **shape** have? Write your answer in the space below.

2. The **shape** below is a rectangle.

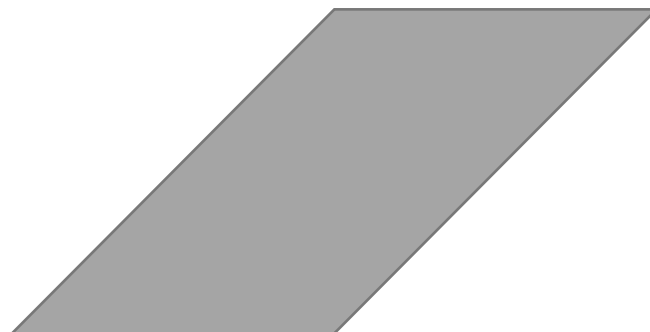

How many lines of symmetry does this **shape** have? Write your answer in the space below.

3. The **shape** below is an equilateral triangle.

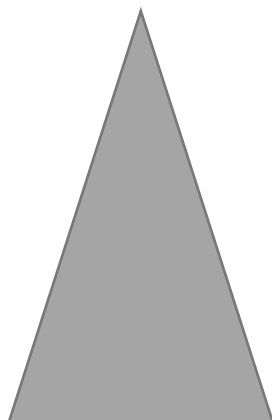

How many lines of symmetry does this **shape** have? Write your answer in the space below.

4. The **shape** below is a parallelogram.

How many lines of symmetry does this **shape** have? Write your answer in the space below.

5. The **shape** below is an isosceles triangle.

How many lines of symmetry does this **shape** have? Write your answer in the space below.

6. The **shape** below is an isosceles trapezium.

How many lines of symmetry does this **shape** have? Write your answer in the space below.

7. The **shape** below is a rhombus.

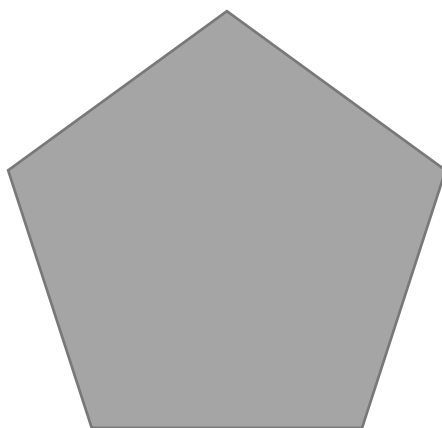

How many lines of symmetry does this **shape** have? Write your answer in the space below.

8. The **shape** below is a rectangle.

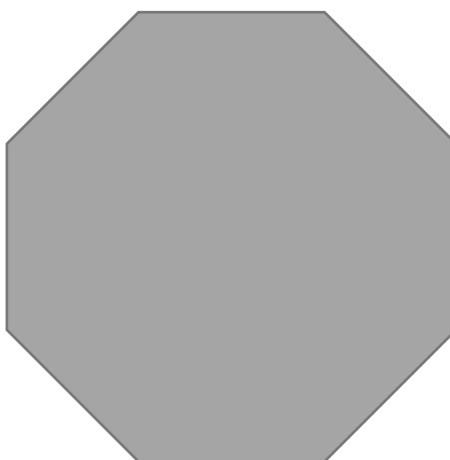

How many lines of symmetry does this **shape** have? Write your answer in the space below.

9. The **shape** below is a regular pentagon.

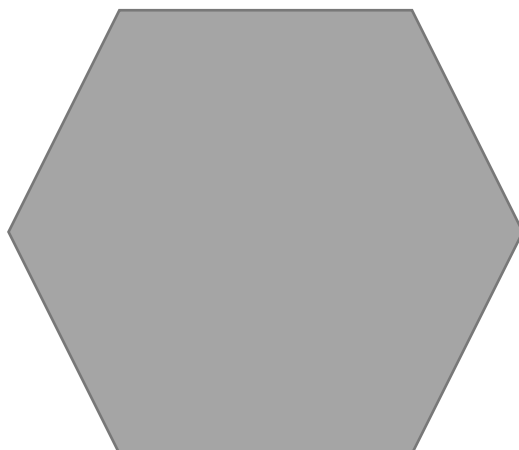

How many lines of symmetry does this **shape** have? Write your answer in the space below.

10. The **shape** below is a regular octagon.

How many lines of symmetry does this **shape** have? Write your answer in the space below.

11. The **shape** below is a regular hexagon.

How many lines of symmetry does this **shape** have? Write your answer in the space below.

12. The **shape** below is a trapezium.

How many lines of symmetry does this **shape** have? Write your answer in the space below.
