

Q5 (Equivalent Fractions) Day 150 Name: _____

1. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{1}{5} = \frac{3}{\boxed{}} = \frac{\boxed{}}{25}$$

2. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{2}{3} = \frac{6}{\boxed{}} = \frac{\boxed{}}{15}$$

3. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{4}{7} = \frac{12}{\boxed{}} = \frac{\boxed{}}{70}$$

4. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{3}{4} = \frac{9}{\boxed{}} = \frac{\boxed{}}{24} = \frac{\boxed{}}{32}$$

5. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{7}{9} = \frac{21}{\boxed{}} = \frac{\boxed{}}{81} = \frac{\boxed{}}{27}$$

6. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{5}{7} = \frac{25}{\boxed{}} = \frac{\boxed{}}{63} = \frac{\boxed{}}{21}$$

7. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{2}{5} = \frac{24}{\boxed{}} = \frac{\boxed{}}{95} = \frac{36}{\boxed{}}$$

8. Look at the fractions below. Fill in each box so all the fractions are **equivalent**.

$$\frac{7}{12} = \frac{35}{\boxed{}} = \frac{\boxed{}}{72} = \frac{49}{\boxed{}}$$

9. Look at the fractions below. Fill in each box so all the fractions are equivalent.

$$\frac{3}{11} = \frac{18}{\boxed{}} = \frac{\boxed{}}{44} = \frac{27}{\boxed{}} = \frac{\boxed{}}{77}$$

10. Look at the fractions below. Fill in each box so all the fractions are equivalent.

$$\frac{5}{6} = \frac{25}{\boxed{}} = \frac{\boxed{}}{36} = \frac{65}{\boxed{}} = \frac{\boxed{}}{120}$$

11. Look at the fractions below. Fill in each box so all the fractions are equivalent.

$$\frac{5}{13} = \frac{25}{\boxed{}} = \frac{\boxed{}}{39} = \frac{20}{\boxed{}} = \frac{\boxed{}}{130}$$

12. Look at the fractions below. Fill in each box so all the fractions are equivalent.

$$\frac{11}{12} = \frac{33}{\boxed{}} = \frac{\boxed{}}{60} = \frac{77}{\boxed{}} = \frac{\boxed{}}{144}$$

Answers

1.	15	5		
2.	9	10		
3.	21	40		
4.	12	18	24	
5.	27	63	21	
6.	35	45	15	
7.	60	38	90	
8.	60	42	84	
9.	66	12	99	21
10.	30	78	100	
11.	65	15	52	50
12.	36	55	84	132
